● Summary

Skilled Full-Stack SAP developer with a strong background in ABAP in S/4 HANA, RAP, SAPUI5, and Workflow. My expertise extends to various facets of SAP development, including enhancements, Business Add-Ins (BADIs), RESTful ABAP Programming Model (RAP), CFL, function modules, and HTML5. I have a proven track record of delivering custom Fiori applications, with a particular focus on RAP (ABAP RESTful Application Programming Model) based solutions. I have designed and developed PO Workflow and created Fiori apps and programs for workflow approvals and notification procedures.

Having 4.7 years of experience in SAP, I was previously part of two successful S/4 HANA implementation projects. Currently, I am working on a Green Field Implementation Project for a life science project where I'm leading Clean Core development with a team size of 7. My experience includes developing APIs, CFL, RAP Events, and EML, leveraging the power of Core Data Services (CDS) Entities. I have successfully extended standard Fiori applications, such as the Order Product Standard Fiori App, to meet specific business requirements. Implemented Agent Based development solution using MCP in VS Code.

I have collaborated closely with functional consultants, resulting in seamless integration of technical and business aspects of SAP projects. I have taken responsibility and accountability for every RICEFW I have delivered or been involved in.

With my comprehensive skill set and a track record of delivering high-quality solutions, I am well-equipped to contribute significantly to any SAP development project and drive innovation within the SAP ecosystem.

Education

08.2017-08.2021

Bachelor's degree, Computer science and engineering
Brainware University
CGPA : 8.03

Skills & Certificates

- ABAP ON HANA
- ABAP RESTFUL PROGRAMMING (RAP)
- ENHANCEMENT
- OOABAP
- CDS
- SAPUI5
- Workflow
- AMDP
- Entity Manipulation Language (EML)
- RAP Events
- Cloud Badi
- Custom Fields and Logic
- Key User Extensibility
- Side by Side Extensibility
- OData Based Adobe Forms
- Agent Based Developments using MCP
- Acquired SAP Fiori Application Developer Associate certification on 21st April, 2024
- Acquired SAP Back-End Developer - ABAP Cloud on Jun 2026

Experience

Capgemini

Consultant

03.2025- Current
AMGEN S4 HANA
Transformation

- Developed Multiple Fiori Applications using RAP and Fiori Templates.
- Integrated Adobe Form with RAP-based Fiori Application.
- Developed Applications using RAP to read Excel file using Determination Event, which is used as a template for the entire project for various Excel-related developments.
- Led the entire custom fields development using Custom Fields and Logic app and using SCFD_EUI.
- Developed a framework to use the RAP-based event mechanism.
- Used standard RAP BO's events such as R_PURCHASEORDERTP and R_SALESORDERTP in the handler class to achieve side-by-side extensibility.

- Migrated multiple ABAP reports to Fiori reports.
- Migrated multiple Web Dynpro applications to Fiori using RAP.
- Developed Fiori List Report with Object Page to read an Excel file to update Purchase Info Record.
- Implemented RAP event-driven solution for complex scenarios like API calls post PO/SO creation or update.
- Implemented and demonstrated Agentic development using MCP in VS Code.
- Created data events to send payload for STO/SO creation update using Event Binding and outbound topics to SAP CPI.
- Developed and demonstrated instance feature control in RAP to dynamically adjust the UI based on user inputs.
- Migrated ABAP reports that run in the background to a class-based approach and scheduled them using Job Catalogue Entry, Job Template, and the Schedule Job Fiori App.
- Implemented Cloud BADIs for SO and PO scenarios.
- Developed APIs for cross-platform communication.
- Migrated multiple Adobe forms to OData based Adobe form using Maintain Form Template Fiori App.
- Developed a class to read XLSX file format with multiple tabs using XCO libraries.
- Worked on HCM and WORKDAY integration closely.
- Provided deep analysis for ARIBA Master Data Export program and resolved various issues with it.
- Fixed multiple IDOCs related issues both inbound and outbound.
- Trained multiple resources on CFL and RAP.
- Delivered multiple technical approaches using the clean core approach.
- Conducted multiple interviews for the project.
- Currently leading clean core development with a team size of 7.

12.2023 - 10.2024

Accenture Solutions Private Limited

Package App Development Analyst

Halliburton

- Developed various objects for the STP and MM module.
 - Designed and developed the Purchase Order Workflow which incorporates the PO release strategy.
 - Worked on the PR workflow, building reports to send notifications and reminders to the approver.
 - Supported building a custom Fiori app for the SES workflow which is used in approval procedures.
 - Designed the email body using HTML5.
 - Linked the workflow task to the My Inbox Fiori App.
 - Built a custom Fiori application for the approval procedure in the workflow which can be accessed through email.
 - Integrated S4 and Ariba systems, facilitating smooth PO and contract creation by implementing several BADIs.
 - Analyzed error messages in SRT_MONI for various interfaces through debugging and provided resolutions and explanations.
 - Implemented web service calls during PO creation for custom validation.
 - Configured URLs to open standard TCODE in the WEBGUI screen from the custom Fiori App.
 - Created RESTful ABAP APIs to process mass data and validate custom business requirements, such as authorization checks and field validations.
 - Implemented Released/Cloud BADIs for Purchase Orders and Purchase Requisitions.
 - Integrated the standard API inside a custom RAP-based API for custom validations in GR posting from Middleware.
 - Resolved critical bugs by debugging standard code and identifying root causes.
 - Developed a FIORI app using the RAP Framework which enables us to upload Excel and CSV files and update the entity using EML. Users will be able to modify local file data in the Fiori list report before posting it in the Z table or any other validations using ACTION.
 - Developed a Fiori App using RAP which enables us to download any attachment in a PO.
 - Implemented several UI features such as Quick View, List Page, Object Page, Value Help, Cross-App Navigation, and URL using Annotations.
 - Developed code that can remove any standard error message during PO or PR creation.
- Implemented Customer Exits and User Exits to manipulate and validate customer requirements.

- Implemented BTE FM for Auto release of PO.
- Worked on Screen Enhancement (ME21N, ME22N, ME23N) and added customer fields using BADI.
- Created Data Dictionary objects such as Domain, Data Elements, Tables, Structures, Range Objects, Lock Objects, TCodes, Table Maintenance Generator, etc.
- Extended OData Service using CFL Fiori app, used CI include and Append Structure to add custom fields in standard tables and structures.
- Proficient in implementing SAP Notes.
- Used new ABAP 7.4+ syntax extensively wherever it's possible.
- Developed ABAP reports using an Object-Oriented approach.

Authored comprehensive technical documentation.

10.2024 - 02.2025
SAP Steampunk Instance

- Working on BTP Steampunk Instance focused on RAP Development
- Working on Cloud ABAP , CDS Entities etc.

Tata Consultancy Services

11.2021 - 12.2023

Sap programming main

Coop Sweden

- Proficiently developed custom Fiori applications, specializing in RAP (ABAP RESTful Application Programming Model) solutions.
- Demonstrated expertise in SAPUI5, SAP ABAP on HANA, and Fiori application development..
- Created WEB APIs for data read and post operations, enhancing system functionality using RAP.
- Leveraged Core Data Services (CDS) views for efficient data modeling and retrieval
- Applied performance tuning techniques to optimize CDS for superior performance.
- Designed and implemented ALV reports using OOPS, ensuring data accuracy and usability.
- Utilized SAP enhancements, BADIs, BAPIs, and RFCs to streamline business processes.
- Developed end to end Custom Fiori App providing solution for Retail Promotion. Used RAP to build the backend OData service and used SAPUI5 in Front end to extend List report template.
- Extended Fiori Elements to add custom column , Fragments, Filters.
- Successfully extended standard Fiori applications, including the Order Product Standard Fiori App, to meet specific business requirements.
- Developed custom List Report ,work list Fiori Apps, enabling user interaction.
- Extended with controller added several validations and logic for UI elements
- Implemented functionality to export user-selected column data to PDF format using JS pdf plugin.
- Conducted thorough debugging to resolve issues promptly and maintain application integrity.
- Proficient in Fiori Tile configuration, Role assignment within the launchpad for a user-friendly experience.
- Worked on OData service, build OData service for XL upload , worked on extending standard OData services, used standard OData services for various developments such as GR posting from middleware.
- Documented and maintained technical specifications
